Skills

Programming language:

- C++
- C
- Python
- R
- HTML, CSS, Javascript
- Scala
- Matlab

- Pytorch, Tensorflow
- Git
- Docker
- Linux
- Adobe Lightroom
- **Photography**

Courses

- Deep learning
- Machine learning
- Data science
- Algorithm and data structure
- Computer organization
- Statistic and probability

Language

Chinese

Intermediate (HSK 4)

English

Fluent (TOEFL 101)

Indonesian

Native

Education

Shanghai Jiaotong University

BSc in Electrical and Computer Engineering

- The JI Encouragement Scholarship Recipient (2020 & 2023)
- The Wu & Jane Sun Sunshine Scholarship Recipient (2022)

Delft University of Technology

Exchange BSc Student in Computer Science

Delft, The Netherlands

February 2022 - July 2022

Experience

Shanghai Taize Semiconductor

Shanghai, China

Shanghai, China

August 2024 (Expected)

Algorithm and Machine Learning Intern

September 2023 - December 2023

- · Led deep reinforcement learning and multi agent reinforcement learning project, implementing **AlphaZero** algorithm using **Pytorch** on a blackjack game from scratch.
- Utilized Monte Carlo Tree Search to determine the optimal moves for the agent.
- Implemented personalized LibTorch library using C++ to incorporate the state representation of the game into the neural network.
- Implemented **policy function** inside the blackjack game for agent training.
- Achieved a 27% advantage in single-agent evaluation against a randomizer agent.
- Achieved a 33% advantage in multi-agent evaluation in a cooperative setting against a team of single agents.
- Initiated a continuous 24-hour training cycle on a server, resulting in a 200% increase in Al training efficiency.
- Initiated way to increase efficiency of debugging C++ code by 53%.

Information System Technology Laboratory, Shanghai, China **Shanghai Jiaotong University**

Front End Web Developer Intern

May 2023 - September 2023

- Developed a personalized website for a pulmonary fibrosis lesion detection system based on image processing research at the Information System Technology Laboratory (IST) of the School of Software, Shanghai Jiaotong University.
- Implemented responsive design and ensured cross-browser compatibility.
- Participated in a client meeting for the weekly report.
- Used JavaScript, CSS, and React.js in developing the websites.

Leadership

PERMIT Shanghai, Indonesian Student

Association in Shanghai

Shanghai, China

Academics and Community Division

- September 2022 July 2023 Organized a collaboration event titled '上海欢迎你' between the Consulate General of Indonesia
- and Indonesian student association in Shanghai, which drew the participation of 50 attendees. Resolved issues for Indonesian students and shared news updates as an administrator for a Shanghai student association forum with 319 members.
- Planned a global event titled 'Shanghai Race,' a Ninja Warrior-style competition that drew the participation of 65 international students from around China.

Relevant Projects

Unsupervised Image Clustering on Digital Handwritten Digits

Shanghai Jiao Tong University

Solo Coursework Project

December 2023

- Designed an unsupervised Convolutional Neural Network (CNN) written in Pytorch to decode MNIST images and clustered into 10 different labels using K-Means clustering.
- Used transformation, such as gaussian noise, gaussian blur, and center crop to the train data set to decrease chance of model being overfit.
- Visualized image clusters using Principal Component Analysis (PCA) for enhanced interpretability.
- Achieved an accuracy score using adjusted rand index of 0.46.
- Achieved loss value of 0.08 for training model with Mean Squared Error as the loss function

Maze Solver

Personal Project

Solo Project November 2023

- Developed a maze solver using Ant Colony Optimization for efficient route finding.
- Implemented a dynamic pheromone-based strategy to guide ants, balancing exploration and exploitation.
- Achieved a 75.2% decrease in the number of iterations compared to the baseline Breath-First Search Algorithm.
- Achieved a 3.6% decrease in route lengths compared to the baseline Breath-First Search Algorithm.

技能

编程语言:

- C++
- Python
- R
- HTML, CSS, Javascript
- Scala
- Matlab

其他:

- Pytorch, Tensorflow
- Git
- Docker
- Linux
- Adobe Lightroom
- 音频母带处理

课程

- 深度学习
- 机器学习
- 数据科学
- 算法与数据结构
- 计算机组织
- 统计与概率

中文 中级(HSK 四级) 英语 精通 (TOEFL 101 分)

印度尼西亚语 母语

教育背景

上海交通大学

中国上海

电子与计算机工程学士学位

预计干2024年8月毕业

密西根学院励志奖学金获得者 (2020 & 2023) 吴炯孙洁阳光奖学金获得者 (2022)

荷兰代尔夫特理工大学

荷兰代尔夫特

计算机科学交换学生

2022年2月至2022年7月

经历

上海泰则

中国上海

算法与机器学习实习生

2023年9月至12月

- 领导深度强化学习和多智能体强化学习项目,从零开始使用PyTorch实现AlphaZero算 法,应用于二十一点游戏。
- 利用**蒙特卡洛树搜索**确定代理的最优移动。
- 使用C++实现了个性化的LibTorch库,将游戏的状态表示整合到神经网络中。
- 在二十一点游戏中实现了**策略函数**,用于代理的训练。
- 在单一代理评估中,相对于一个随机代理,取得了27%的优势。
- 在合作环境中的**多代理评估中**,相对于一个单一代理团队,取得了**33%**的优势。
- 在服务器上启动了连续的24小时训练周期,导致**人工智能训练效率**增加了**200%**。
- 启动了一种提高C++代码调试效率的方法,提高了53%的效率。

信息系统技术实验室, 上海交通大学

中国上海

前端开发实习生

2023年5月至9月

- 在上海交通大学软件学院信息系统技术实验室进行基于图像处理研究的肺纤维化病变检 测系统个性化网站开发工作。
- 实现了响应式设计并确保了**跨浏览器兼容性**。
- 参与了每周报告的客户会议。
- 在网站开发中使用了JavaScript、CSS和React.js。

领导力

PERMIT Shanghai, 印度尼西亚留学生协

会上海分会

中国上海

学术和社区部门

2022年9月至2023年7月

- 组织了一场名为"上海欢迎你"的协作活动,由印度尼西亚总领事馆和上海印尼学生协会 合作,吸引了50名参与者。
- 为印尼学生解决问题,并作为上海学生协会论坛的管理员,分享新闻更新,该论坛有
- 策划了一场名为"上海赛"的全球活动,是一场忍者勇士风格的比赛,吸引了来自全国各 地的65名国际学生参与。

项目

数字手写图像的无监督图像聚类

上海交通大学 2023年12月

个人项目

• 设计了一个用PvTorch编写的无监督卷积神经网络,用于解码MNIST图像并使用K均值

- 聚类分成10个不同的标签。 使用转换技术,如**高斯噪声、高斯模糊和中心裁剪**,对训练数据集进行处理,以减少模
- 型过拟合的可能性。 使用**主成分分析**可视化图像聚类,以提高可解释性。
- 通过调整兰德指数实现了准确度得分为0.46。
- 使用**均方误差**作为损失函数,在训练模型时实现了**0.08**的损失值。

迷宫求解器

独立项目 2023年11月

个人项目

- 使用**蚁群优化算法**开发了一个迷宫求解器,用于高效的路径查找。
- 实施了一种**基于动态信息素的策略**,以引导蚂蚁平衡探索和利用。
- 相较于基准的广度优先搜索算法,达到了迭代次数减少了75.2%的效果。 相较于基准的广度优先搜索算法,实现了**路径长度**减少了**3.6%**。
